

# RECYCLING TRAILER

**LONGEST WARRANTY IN THE BUSINESS**

**10 BIN  
MODEL**

**TOW WITH  
STANDARD  
PICKUP**

## FEATURES

<b>Engineered for SAFETY</b>	Because the <i>AlleyCat</i> has hydraulic, self-actuating, surge brakes on all wheels, its self-contained brake system requires no external connections to the truck. All LED lights, safety chains, wheels, tires and emergency breakaway meet or exceed D.O.T. regulations.
<b>Handicap ACCESSIBLE</b>	The self-closing doors have a 54" fill height and can be opened with a closed fist. These features comply with A.D.A. (American Disabilities Act) guidelines. ♿
<b>Quick &amp; Easy OFFLOADING</b>	Raise the spring assisted cover, remove the full bins with a forklift, and replace with a set of empty bins.
<b>Large Storage CAPACITY</b>	Each of the six removable bins holds one cubic yard (200 gallons) capacity. Heaped capacity can yield more.
<b>A Real Recycler's TRAILER</b>	Careful selection of quality materials used in the manufacturing of this unit has produced a trailer made from up to 80% recycled materials.

# RECYCLING TRAILER

Lift assisted bin covers are one of the many special features reflecting the *AlleyCat's* overall focus on safety and function.

The AlleyCat is designed for quick and easy servicing. Simply raise the cover and exchange full bins for a set of empties.
